Lot	Title	Lot	Title
0392	Howe Scale Company, established in the mid-19th century, was known for its innovative scale designs. Function: It's a mechanical scale that uses a spring or lever system to measure weight, indicated by the needle on the dial. Capacity: The scale in the image has a maximum capacity of 300 (likely pounds). Material: Constructed with metal components, including a cast iron or steel base and a metal dial casing. Age: Given the design and wear, it's probably a vintage or antique scale, potentially dating back to the early 20th century or earlier. Usage: Originally used in various settings, such as general stores, warehouses, or farms, for weighing goods and materials. Condition: The scale shows signs of age and use, including dust, scratches, and wear on the paint and metal surfaces.	0410	Sears REGULAR MOTOR OIL 2 1/2 Gallon Can With Contents
